

Internal domain

The internal domain of BIS-Fogo provides

1. information on the planning of workshops, field trips and other activities
2. information on the general structure of the BIS-Fogo web space
3. information on the usage of other resources like flickr, GitHub etc.
4. information on the creation of learning modules and other content
5. a staging area namespace for the creation and editing of learning modules before their public release

Please note that the information sections do not present guidelines but mandatory rules. Learn them, live them and have a nice ride.
